Congratulations! We are happy to let you know that we approved your application to become a Common Sense Digital Citizenship: Certified Educator. We are truly inspired by your devotion to teaching young people how to be safe, responsible digital citizens.

We would like to acknowledge your work by including the Digital Citizenship Certified Educator badge on an online profile. At this time, we don't have the capabilities to add educator profiles on Common Sense Education but we do have educators' profiles on Graphite, Common Sense Education's site dedicated to providing ratings and reviews for teachers by teachers for digital tools used in the classroom. **If you are inclined (and haven't already), please create a profile on Graphite, which we can then badge with the Digital Citizenship Educator badge. If you already have a profile on Graphite, please send me your URL and we will post the badge.**

Additionally, we would love to promote your certification! **Please send me your twitter handle, if you have one, and let me know if we have your permission to potentially use your graphite profile as the educator featured in the Common Sense weekly newsletter.**

Again, we appreciate your commitment to teaching digital citizenship to students. It's only common sense for us to work together and we applaud your efforts. We will enter you in the yearly raffle to win the latest tech gadget, the winner of which we'll announce in early July 2015. I look forward to hearing from you regarding the profile and newsletter and please contact me if you have any questions.

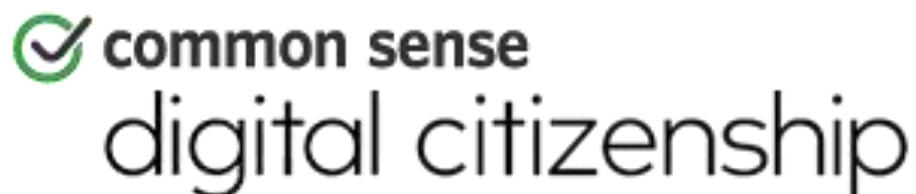

Sincerely,

Christine
